Windmills

Whissendine Windmill

Melton Road, Whissendine, Rutland, LE15 7EU
Tel: +44 (0)1664 474172

The windmill is a 60 foot tower mill built in 1809 to mill flour. Work ended in about 1922 and the mill was left untouched until it was purchased in 1995 by Nigel Moon, a professional windmill restorer and miller. Nigel had previously worked on Soham windmill and Wymondham windmill.

The mill at Whissendine, which started milling in 2009, now produces a range of flours. They are sold at select local outlets and at the mill.

This site is managed as an English Heritage grant supported site and it is open for visits between 9am and 4pm on week days only. The windmill has 4 stones and a roller mill. You will need to contact Mr Moon to arrange a visit.

Flour produced at the mill is of excellent quality for bread baking. There are wholemeal, strong white, spelt and other varieties to choose from.
